My review is about Spiderman 1.

I'm going to get Spider Man 3 for my birthday. Dark Venom is going down!

On the spiderman game, I have some handy cheat code effects. The cheat code effects are small spiderman, play as peter parker, and much more!

Did you know that if you press and hold R2, the web swing will get faster? The only thing I don't like about that is, I have less control while moving.

I use a Spiderman 3 template on my SuperMoneyKid Blog.
