Octomania is played on Wii devices which make its features look more enhanced and amazing experience for the gamer. This year, the games are being attracted more towards the game due to the reason that this game is other than the formal games like first person games and other over head games.

This is a puzzle game which makes the mind of the person playing the game more sharp. Hence, instead of wasting your time in other games, you should see Octomania as your choice that can help you in making your IQ skills strong.

In the game, you will have to use Wii remote controls to play the game, and then you will have to fill the colored octopuses. The octopuses can rotate clockwise and you can make the trick to win the game accordingly.

The real fun of playing game lies inside it and if you will not play the game, you will not come to know the exact fun of the game.
