

Entry PDA For Girls

Contributed by Tony
Thursday, 17 April 2008

It seems that PDA's are not longer just for busy college students and working professionals anymore; with the Diary Girl for the Nintendo DS young ladies everywhere are now being exposed to the wonders of organization.

Diary Girl is more than a simple diary; it is also a contact manager, scheduler, voice recorder, and believe it or not an internet telephone through the Nintendo wifi service.

Diary Girl is not all little miss professional, however, players can also customize their very own avatar with a number of different clothing and style choices. Although Diary Girl will not be for most people, the game (and I hesitate to call it that) still has its charms, and the VoIP phone is definitely neat. {mosgoogle}
